Skills

Frontend

Build responsive and scalable web interfaces using modern JavaScript frameworks and CSS utilities, with a focus on performance and usability.

React, Next.js, TypeScript, Tailwind CSS, Vue.js, Ajax, jQuery, Angular

Backend

Build secure and scalable backend APIs and services using modern frameworks and cloud native architectures.

Node.js, Express, Python, Django, Spring, GraphQL, AWS SAM, Lambda, API Gateway

Databases

Design, manage and optimize relational and NoSQL databases for reliable and efficient data storage.

PostgreSQL, MongoDB, SQL, Oracle, AWS DynamoDB, MySQL, RDS, AWS Aurora

Cloud & DevOps

Support automated build, deployment, and cloud infrastructure processes to improve reliability, scalability, and delivery speed.

Fargate, Lambda, S3, Docker, Kubernetes, CI/CD, Terraform, AWS ECS, AWS ECK, CloudFormation, Beanstalk, AWS IAM, AWS Glue, Athena

Tools

Standard collaboration, version control, and testing tools to support efficient development, teamwork, and delivery.

Git, GitHub, JIRA, Confluence, Postman, Agile/Scrum/Kanban

Interests

Technical Hobbies

Coding small open-source projects, Continuous learning through online courses, Reading about emerging ICT trends and technologies

Personal & Balance

Fitness, healthy lifestyle, Community involvement, knowledge sharing

Certifications

AWS Certified Cloud Practitioner
AWS
November 2025

AWS Certified Developer - Associate
AWS
November 2025

AWS Certified CloudOps Engineer - Associate
AWS
November 2025

Summary

I am a double cum laude graduate with an honours degree in Information Systems and currently pursuing my masters in Information Technology. As a full-stack software developer with four years of hands-on experience, I'm currently a Software Dev Engineer Graduate at BMW South Africa. I specialise in digitalisation, system automation, web development, database design, cloud computing, API integration, and Driver Assistance Functions testing. I have architected and deployed cloud-native solutions used across BMW plants locally and globally.

Experience

BMW South Africa **March 2025 - Present**
Software Engineer (Graduate) Pretoria, Rosslyn

- Developed a comprehensive tracking tool consolidating data from multiple sources
- Enabled technicians and engineers to manage testing cars efficiently with unified data access
- Architected and deployed full-stack solution using modern cloud-native architecture
- Implemented containerized microservices with AWS ECS Fargate for scalability and reliability
- Centralized vehicle testing data into single application, eliminating need for multiple apps
- Developed Spring Validation Tool for visualizing car weight distribution and spring measurements
- Deployed tool globally across BMW plants in South Africa, Germany, Mexico, USA, and China
- Created interactive visualization system for engineers to analyze how different car options influence spring load
- Responsible for testing Driver Assistance Functions features of the x3 G45

BMW South Africa **April 2024 - February 2025**
Software Engineer (Intern) Pretoria, Rosslyn

- Successfully built Project Management Tool to manage all x3 G45 projects
- Automated data aggregation from multiple sources, replacing manual Excel processes
- Deployed enterprise solution now used by entire BMW Plant 09 for project management steering
- Reduced human errors through automation and enabled real-time data synchronization
- Provided web-based access to build plans, eliminating dependency on static files and folder navigation
- Streamlined project build tracking, car data management, and reporting workflows

University of Johannesburg **February 2023 - November 2023**
Software Development Tutor Johannesburg, Auckland

- Guided students through core programming concepts and best practices
- Provided one-on-one mentoring and assignment support
- Helped improve student understanding and academic performance
- Facilitated practical coding sessions and workshops

Education

University of Johannesburg **Jan 2025 - Present**
MCom Information Technology Masters

Henley Business School **Jan 2025**
Higher Certificate in Management Practice Higher Certificate

University of Johannesburg **Jan 2023 - Dec 2023**
Hons Information Systems Honours
80%

University of Johannesburg **Jan 2020 - Dec 2022**
BCom Information Systems Bachelor's
85%
